APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the place of use of the waters of an underground source as heretofore granted under Permit 46578 is issued subject to the terms and conditions imposed in said Permit 46578 and with the understanding that no other rights on the source will be affected by the change proposed herein.

This permit is issued subject to existing rights and is further subject to revocation if and when water can be furnished by an entity such as a water district or a municipality engaged in furnishing water. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of water begins or before the Proof of Completion of Work is filed. It is understood that this right must allow for a reasonable lowering of the static water level. The well shall be equipped with a (2) two-inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

In the event that such an entity or water district is not available to provide service within five (5) years from the date of issuance of this permit, the permittee is required to proceed to obtain a water supply from the Colorado River-Lake Mead which is the alternate source identified for the basis of the issuance of this revocable permit. The specific date of revocation of this permit will be determined upon a good faith and diligent effort to secure an alternate water source. (TERMS CONTINUED)  
 The amount of water to be changed shall be limited to the amount which can be applied to beneficial use, and not

to exceed 0.50 cubic feet per second, but not to exceed 184.0

acre-feet annually.

Work must be prosecuted with reasonable diligence and be completed on or before May 23, 1983

Proof of completion of work shall be filed before June 23, 1983

Application of water to beneficial use shall be made on or before May 23, 1989

Proof of the application of water to beneficial use shall be filed on or before June 23, 1989

## (PERMIT TERMS CONTINUED)

The total combined duty of water under this permit and Permit 46577 shall not exceed 184.0 acre-feet annually.

The State Engineer may also make a determination as to the influence of withdrawals of water under this permit on the waters of the Colorado River for the purpose of classifying the source under this permit as an infiltration well or gallery.
